Subject Index

Absorbers
Optimal Design of Base-Isolated Structures with Dynamic Absorbers, 166

Absorption
Comparison of Wave Reflection Equations with Wave-Tank Data, 1204
Composite Sorption of Pure Vapors on Polyolefins, Carbon, and Minerals, 377

Acceleration
Analysis of Site Liquefaction Using Earthquake Records, 458
Integrated System for Managing Owner-Directed Project Acceleration, 93

Accelerators (Particles)
Survey and Alignment of Particle Accelerators and Transport Lines, 1050

Accelerometers
Structural Damage Identification from Dynamic-Test Data, 980

Accident prevention
Analysis of Accident Reduction Potentials of Pavement Markings, 1105
Humanware, Human Error, and Hiyari-Hat: A Template of Unsafe Symptoms, 115

Accidents
Evaluating Roadside Hazards Using Computer-Simulation Model, 1076

Accountability
Review of Postconstruction Evaluation Procedures for Infrastructure Projects, 703

Accounting
A Primer for Financial Management of Small Consulting Firms, 707

Accreditation
Assessment: How to Make Lemons into Lemonade, 808

Accretion
Mechanics of Growing Deformable Solids: A Review, 165

Accuracy
Anatomy of Best Estimate, 565
Error Evaluation of Three Random-Field Generators, 292
Using GPS to Improve Existing Classical Network, 1055

Acid rain
Critical Loads and Development of Acid Rain Control Options, 321

Acidic water
Removal of Formate from Wastewater by Anaerobic Process, 387

Acoustics
New Acoustic Meter for Measuring 3D Laboratory Flows, 548

Acquisition
Consolidation in the Environmental Engineering Industry, 714

Activated carbon
Alternative Disinfectants for Drinking Water Treatment, 351
Composite Sorption of Pure Vapors on Polyolefins, Carbon, and Minerals, 377
DBP Control in Drinking Water: Cost and Performance, 352
Effects of Oxidant on Thermal Regeneration of Granular Activated Carbon, 316
Performance Evaluation of Ceramic Filter Candles, 405
Use of Granular Activated Carbon Columns for Lead Removal, 329

Activated carbon filters
Biological Colonization of Granular Activated Carbon Filters in Drinking-Water Treatment, 359
Prediction and Verification of Atrazine Adsorption by PAC, 317

Activated carbon treatment
Adsorption of 1,1,2-Trichloroethane from River Water, 389

Activated sludge
Calibration of Poorly Identifiable Systems: Application to Activated Sludge Model, 342
Comprehensive Fate Model for Metals in Municipal Wastewater Treatment, 380
Effects of Gravity Currents in Circular Secondary Clarifiers, 362
Estimating Toxicity of Organic Chemicals to Activated-Sludge Microorganisms, 393
KBES for Process Control of Nitrification in Activated Sludge Process, 310
Numerical Approach to Clarifier Operation According to Flux Theory, 345
Off-Gas Recycle for VOC Emission Control: Conceptual Model, 339

Activated sludge process
Effect of Acid Orange 7 on Nitrification Process, 311

Active control
Frequency Domain Optimal Control Strategies for Aseismic Protection, 161
Modal Predictive Control of Structures. I: Formulation, 253
Modal Predictive Control of Structures. II: Implementation, 254
Optimal Configuration of Active-Control Mechanisms, 185
Seismic Response Control of Bridges by Variable Dampers, 987
Single-Degree-of-Freedom Nonlinear Homogeneous Systems, 243

Adaptive systems
Adaptive Forecasting of Hourly Municipal Water Consumption, 1186

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, 187

Admixtures

Admixture Applications in Large Concrete Pours, 771

Advances in Cement and Concrete, 1359

Cement Manufacture and Use, 1367

Characteristics of Silica-Fume Concrete, 772

Knowledge-Based Expert System for Concrete Mix Design, 111

Utilization of Used Foundry Sand in Concrete, 766

Adsorption

Adsorption of 1,1,2-Trichloroethane from River Water, 389

Composite Sorption of Pure Vapors on Polyolefins, Carbon, and Minerals, 377

Prediction and Verification of Atrazine Adsorption by PAC, 317

Treatment of Metal Industrial Wastewater by Fly Ash and Cement Fixation, 394

Use of Granular Activated Carbon Columns for Lead Removal, 329

Vapor Adsorption of Trichloroethylene on Quartz Sands of Varying Grain Size, 325

Advection

Conservative Characteristics-Based Schemes for Mass Transport, 587

Aeration

Chicago's Waterfalls, 1288

Vortex Convection Produced by V-Shaped Dihedral Obstruction, 597

Aerobic treatment

Oxygen Utilization of Trickling Filter Biofilms, 381

Aerodynamics

Identification of Aeroelastic Parameters of Flexible Bridges, 252

New Airfoil-Design Concept with Improved Aerodynamic Characteristics, 37

Aeroelasticity

Identification of Aeroelastic Parameters of Flexible Bridges, 252

Optimization Procedure for Design of High-Speed Prop-Rotors, 24

Aerospace engineering

Viscoplastic Response of Structures for Intense Local Heating, 18

Aerospace transport

System for Orbital Recovery of Space Shuttle's External Tank, 20

Affirmative action

Past, Present, and Future of ASCE: Equal Opportunity Programs, 824

Age factors

Road-Maintenance Planning Using Genetic Algorithms. II: Analysis, 1104

Aggregates

By-Product of Sulfur Recovery from Phosphogypsum as Concrete Aggregate, 777

Compacted High-Gravel-Content Subgrade Materials, 1074

Resilient Moduli of Granular Materials, 1120

Rough Cracks Subjected to Earthquake Loading, 925

Short Aggregate Piers Defeat Poor Soils, 1336

Strategy for Beneficial Use of Stoker-Boiler Coal Ash, 328

Aggregation

Effect of Aggregation on *Vibrio Cholerae* Inactivation, 358

Spatial Disaggregation for Studies of Climatic Hydrologic Sensitivity, 609

Aging

Aging Effect on Bond Strength in Composite Sections, 779

Comparative Analysis of Bridge Superstructure Deterioration, 961

Creep and Shrinkage Deflections of RC Beams with Steel Fibers, 780

Maintaining Reliability of Concrete Structures. I: Role of Inspection/Repair, 890

Maintaining Reliability of Concrete Structures. II: Optimum Inspection/Repair, 891

Setup and Relaxation in Glacial Sand, 486

Variables Affecting Cyclic Behavior of Reinforcing Steel, 1020

Agitation intensity

Effect of Preagitation on Freeze-Thaw-Conditioned Sludge Dewaterability, 54

Agricultural wastes

Optimal Control of Ground-Water Quality Management: Nonlinear Programming Approach, 1190

Restoring the Everglades, 1252

Agricultural watersheds

Seasonal Distributions of Peak Flows From Small Agricultural Watersheds, 642

Agriculture

Bacterial Density Changes Across Sludge Disposal Facility, 313

Bromide Transport under Sprinkler and Ponded Irrigation, 688

Non-Point-Source Pollution from Interrill Flow Areas, 686

Air entrainment

Frost Susceptibility of Concrete in Near-Saturated States, 768

Velocity of Air-Core Vortices at Hydraulic Intakes, 540

Air flow

Air-Permeability Measurement for Soil at Low and High Pressure, 386

Effects of Air Compression and Counterflow on Infiltration into Soils, 666

Air injection

Design Optimization of Coventry Municipal Solid Waste Incinerator, 402

Air pollution

Critical Loads and Development of Acid Rain Control Options, 321

Emission-Cost Trade-offs and Rate Feedback for Electric Utilities, 150

Kinetics of SO_2-Dolomite Reaction: Application of Random Pore Model, 754

New Methodology for Modeling Annual-Aircraft Emissions at Airports, 1083

Air quality
Change in Gasoline Constituent Mass Transfer During Soil Venting, 401
Transportation Planning and Air Quality II, 1421

Air routes
Investigation of Conflict Characteristics at Airway Intersections, 1112

Air traffic
Investigation of Conflict Characteristics at Airway Intersections, 1112

Air transportation
Passenger-Terminal Simulation Model, 1093

Air water interactions
Estimating Air Conductivity and Porosity from Vadose-Zone Pumping Tests, 323

Airblast
Ground Motions and Air-Blast Effects of Explosive Demolition of Structures, 141

Aircraft
Damage Containment and Residual Strength of Composite Laminates, 31
Deicing Denver, 1293
Dynamic Response and Progressive Failure of Special Structures, 1376
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, 37
New Methodology for Modeling Annual-Aircraft Emissions at Airports, 1083
Optimum Design of Airport Enplaning Curbside Areas, 1094

Aircraft technology
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, 37
Optimization Procedure for Design of High-Speed Prop-Rotors, 24

Airport construction
Construction of an Island, 102
Hong Kong: The US$10 Billion Dollar Question, 1347

Airport design
Aviation Crossroads: Challenges in a Changing World, 1365

Airport terminals
Aviation Crossroads: Challenges in a Changing World, 1365
Passenger-Terminal Simulation Model, 1093
Planes, Trains and the Games, 1297

Airports
Aviation Crossroads: Challenges in a Changing World, 1365
New Methodology for Modeling Annual-Aircraft Emissions at Airports, 1083
Optimum Design of Airport Enplaning Curbside Areas, 1094

Alfalfa
Dormancy and Nondormancy Alfalfa Yield and Evapotranspiration, 693
Nutrient Leaching from Alfalfa Irrigated with Municipal Wastewater, 369

Algorithms
Augmented Lagrangian Genetic Algorithm for Structural Optimization, 21
Concurrent Genetic Algorithms for Optimization of Large Structures, 34
Downstream Control Algorithm for Irrigation Canals, 645
Error Evaluation of Three Random-Field Generators, 292
Finite-Element Calculations on Alliant FX/80, 45
Genetic Algorithms Compared to Other Techniques for Pipe Optimization, 1161
Genetic Algorithms in Discrete Optimization of Steel Truss Roofs, 73
Parallel Algorithms for Integrated Structural/Control Optimization, 35
Prediction of Deep-Bed–Filter Performance Using Recursive Algorithms, 363
Road-Maintenance Planning Using Genetic Algorithms. I: Formulation, 1103
Road-Maintenance Planning Using Genetic Algorithms. II: Analysis, 1104
Spectral Representation of High-Frequency Space Shuttle Data, 36
Stable Reinforced-Concrete Section-Analysis Procedure, 1011

Alignment
Finite-Element Analysis of Elastoplastic Discontinuities, 289
Survey and Alignment of Particle Accelerators and Transport Lines, 1050

Alkalinity
Checking Concrete Growth, 1241

Alluvial channels
Criteria for Evaluating Flow Classes in Alluvial Channels, 564
Lacey Divergence Equations for Alluvial-Canal Design, 600
Seepage Effects on Sand-Bed Channels, 616

Alluvial fans
Comparison of Results from Alluvial Fan Design Methodology with Historic Data, 626

Alluvial streams
Migration of Backward-Facing Step, 566
Selection of Gravel-Transport Formula for Stream Modeling, 563
Streambed Armoring, 577

Altimeters
Satellite Observations of Wave Heights in Arabian Sea and Bay of Bengal, 1225

Aluminum
Effects of Temperature and pH on Residual Aluminum in Alkaline-Treated Waters, 337
Simulation of Blast Pressure on Flexible Panels, 955

Alums
Dynamics of Coagulation of Clay Particles with Aluminum Sulfate, 315

Amplification
1988 Armenia Earthquake. II: Damage Statistics Versus Geologic and Soil Profiles, 407
Deflection Amplification Factor for Seismic Design Provisions, 979

Anaerobic digestion
Effect of HRT on Acidogenic Digestion of Primary Sludge, 343
Effect of Preagitation on Freeze-Thaw-Conditioned Sludge Dewaterability, 54

Anaerobic processes
Histological Analysis of Microstructure of UASB Granules, 384
ORP Measurement in Anaerobic Systems Using Flow-Through Cell, 404
Removal of Formate from Wastewater by Anaerobic Process, 383

Analysis
Arching in Piled Embankments, 506
Buckling Mode Change of Antisymmetric Angle-Ply Laminates, 192
Comparison of Wave Reflection Equations with Wave-Tank Data, 1204
Free-Vibration Analysis of Point-Supported Orthotropic Plates, 157
Inelastic Limit States Design. Part I: Planar Frame Studies, 9
Inverse Transient Analysis in Pipe Networks, 579
Lateral Load Analysis of Groups of Piles and Drilled Shafts, 460
Minimum Thickness of Compacted Soil Liners: II. Analysis and Case Histories, 413
Nonlinear Reservoir Routing: Particular Analytical Solution, 560
Seismic Behavior of Open-Web Truss-Moment Frames, 942
Shoreline Solution for Tapered Beach Fill, 1232

Anchorages
Bar Yield Penetration in Monotonically Loaded Anchorages, 897
Construction of Akashi-Kaikyo Bridge West Anchorage, 110
Tests of Yielding Anchorages Under Monotonic Loadings, 898

Anchors
Locking Into Success, 1262
Vertical Uplift Capacity of Horizontal Anchors, 466

Anemometers
Combined Oscillatory and Steady Flow Over Ripples, 1211

Anion exchange
Removing Selenium(IV) and Arsenic(V) Oxyanions with Tailored Chelating Polymers, 12

Anisotropic materials
Stresses in Anisotropic Rock Mass with Irregular Topography, 159

Anisotropic soils
Model Prediction of Anisotropic Behavior of Boston Blue Clay, 415
Performance of Anisotropic Geosynthetic-Reinforced Cohesive Soil Mass, 468

Anisotropy
Air-Permeability Measurement for Soil at Low and High Pressure, 386
Anisotropic Plasticity Model for Foams and Honeycombs, 264
Formulation of MIT-E3 Constitutive Model for Overconsolidated Clays, 414
Plane Orthotropic Layer by Transfer Matrix–Spline Boundary Element, 215

Antennas
Determination of Look Angles to Geostationary Communication Satellites, 1057

Approximation
Approximate Elastic-Plastic Solution for Axially Loaded Piles, 492
Approximate Form of Green-Ampt Infiltration Equation, 621
Approximate Formulas for Effective Length of Steel Columns, 999
Numerical Approach to Clarifier Operation According to Flux Theory, 345
Simple Method for Approximate Analysis of Framed Tube Structures, 910

Approximation methods
Approximate Random Vibration Analysis of Classically Damped MDOF Systems, 158
Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, 291
Common Misconceptions about Neural Networks as Approximators, 75

Aquifer tests
Non-steady-Flow Type Curves for Strip Aquifers with Constant Drawdown, 663

Aquifers
Drawdowns for Leaky-Aquifer Flow with Storage in Finite-Width Sink, 669
Kinetics of Toluene Degradation by Denitrifying Aquifer Microorganisms, 385
A New Angle on Ground-Water Remediation, 1264
Non-steady-Flow Type Curves for Strip Aquifers with Constant Drawdown, 663
Optimal Capacity-Expansion Planning in Multiaquifer Systems, 1183
Partial Infeasibility Method for Chance-Constrained Aquifer Management, 1139
Risk Management in Wellhead Protection, 1154
Stochastic Analysis of Ground-Water Flow in Semiconfined Aquifer, 531
Transient Canal Seepage to Sloping Aquifer, 619
Transient Radius of Influence Model, 680
Using Cavity Well to Determine Aquifer Thickness and Constants, 647

Arbitration
Dispute Avoidance and Resolution for Consulting Engineers, 1375
Five Steps to Resolving Construction Disputes–Without Litigation, 725

Arches
Analytical Approach to Collapse Mechanisms of Circular Masonry Arch, 972
Ground-Motion Spatial Variation Effects on Circular Arch Responses, 284
Stability of Masonry Piers and Arches Including Sliding, 171
Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, 273

Arching
Arching in Piled Embankments, 506

Architect/engineers
Portfolio Approach to Strategic Management of A/E Firms, 737
Value of Concurrent Engineering for A/E/C Industry, 720

Architects
Building the Urban Environment, 1357
Organizational Attitudes of Senior Professionals, 718

Architecture
Case-Based Preliminary Building Design, 82

Argentina
Argentina: Back in Business, 1353

Arid lands
Asphalt Pavement Temperature Related to Arid Saudi Environment, 749
Effect of Saline Irrigation Water on Tree Growth, 681
Effectiveness of Water-Conservation Measures in Greater Athens Area, 1179
Transmission Losses from Ephemeral Stream in Arid Region, 659

Arizona
Taking Trash Out of Hiding, 1243

Armenia
1988 Armenia Earthquake. I: Seismological, Geotechnical, and Structural Overview, 406
1988 Armenia Earthquake. II: Damage Statistics Versus Geologic and Soil Profiles, 407
Ground-Motion and Soil-Response Analyses for Leninakan, 1988 Armenia Earthquake, 422
Liquefaction and Embankment Failure Case Histories, 1988 Armenia Earthquake, 436
Seismological, Soil and Valley Effects in Kirovakan, 1988 Armenia Earthquake, 423

Armor units
Breakwater Armor Damage due to Wave Groups, 1201
Offshore Rescue, 1315
Wave-Induced Forces on Armor Unit on Berm Breakwaters, 1206

Aromatic hydrocarbons
Source-Receptor Modeling of PAHs Using Deposition Levels in Winter-Long Urban Snowpack, 379

Arsenic
Removing Selenium(IV) and Arsenic(V) Oxyanions with Tailored Chelating Polymers, 12

Artesian aquifers
Field-Test Results of Aquifer Thermal Energy Storage at St. Paul, Minnesota, 148

Artificial intelligence
Case-Based Preliminary Building Design, 82
Common Misconceptions about Neural Networks as Approximators, 75
Computing in Civil Engineering, 1370
Computing Truck Attributes with Artificial Neural Networks, 66
Geometric-Based Reasoning System for Project Planning, 59
KBES for Process Control of Nitrification in Activated Sludge Process, 310
Neural Networks in Civil Engineering. I: Principles and Understanding, 63
Neural Networks in Civil Engineering. II: Systems and Application, 64
Neuromodex—Neural Network System for Modular Construction Decision Making, 68

Artificial recharge
Management of Recharge Dams in Saudi Arabia, 1178

ASCE Awards & Prizes
Analysis of Deep Excavation in Boston, 5
Anatomy of Best Estimate, 565
Behavior-Based Method to Determine Design Shear in Earthquake-Resistant Walls, 10
Control of Disinfection By-Products in Drinking Water, 350
CRANIUM: Device for Improving Crane Productivity and Safety, 14
Design of Bridge Pier Pile Foundations for Ship Impact, 2
Discussion of: Calculation of Total Conveyance in Natural Channels, 6
Energetic Bubble Plumes in Arbitrary Stratification, 7
Engineers and Managerial Challenges: A Transitional Perspective, 1287
Estimating Thaw-Strain Settlement of Frozen Fill, 1
Estimating Thaw-Strain Settlement of Frozen Fill, 3
Human Factors in Civil and Geotechnical Engineering Failures, 13
Hydraulic Conductivity of Compacted Clay Frozen and Thawed in Situ, 4
Inelastic Limit States Design. Part I: Planar Frame Studies, 9
Instability of Buildings Subjected to Earthquakes, 8
Investments in the Future, 1289
Is It Necessary to Compromise Engineering Ethics to Remain Competitive in Today's Marketplace?, 1273
Lessons Learned From Missed Predictions, 494
Removing Selenium(IV) and Arsenic(V) Oxyanions with Tailored Chelating Polymers, 12
Steel Penstocks, 11

ASCE Committees
Past, Present, and Future of ASCE: Equal Opportunity Programs, 824

ASCE Employment Conditions
ASCE 1993 Salary Survey, 826
ASCE Salary Survey 1993, 1364

ASCE Outstanding Civil Engineering
Chicago's Waterfalls, 1288
Investments in the Future, 1289
The Rest of the Best, 1290

ASCE Publications
ASCE Annual Combined Index - 1993, 1362
Transactions of the American Society of Civil Engineers - 1993, 1420

ASCE Younger Members
Is It Necessary to Compromise Engineering Ethics to Remain Competitive in Today's Marketplace?, 1273

Ashes
Characterization and Use of Fluidized-Bed-Combustion Coal Ash, 395

Thermoplastic Stabilization of MSW Combustor Ash, 314

Asia

Marketing Professional Services in Asia, 734

Asphalt cement

Asphalt Portland Cement Concrete Composite: Laboratory Evaluation, 1068

Use of Gel-Permeation Chromatography in Predicting Properties of Asphalt, 773

Asphalt pavements

Asphalt Pavement Temperature Related to Arid Saudi Environment, 749

Aviation Crossroads: Challenges in a Changing World, 1365

Comparison of Nuclear and Core Pavement Density Measurements, 1119

Effect of Testing Variability on Contractor Payment for Asphalt Pavements, 124

Asphalts

Comparison of Unconfined- and Confined-Creep Tests for Hot Mix Asphalt, 769

Dynamic Linear Back Calculation of Pavement Material Parameters, 1069

Dynamic Pavement-Strain Histories from Moving Traffic Load, 1111

Performance of Fuel-Resistant Sealers for Asphalt Concrete Pavements, 759

Asymmetric structures

Cables Over the Mississippi, 1249

A League of Their Own, 1272

Asymmetry

Asymmetric Flow into Well by Finite Elements, 648

Experimental Study of Three-Dimensional Wave Breaking, 1193

Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, 197

Velocity Measurements in Asymmetric Turbulent Channel Flows, 582

Atmospheric pressure

Atmospheric Pressure within Lunar Structure, 41

Atterberg limits

Effect of Material Properties on Compactability and Bearing Capacity, 1096

Attitudes

Industrial Facility Quality Perspectives in Owner Organizations, 794

Organizational Attitudes of Senior Professionals, 718

Audits

Construction Facilities Audit: Quality System-Performance Control, 731

Review of Postconstruction Evaluation Procedures for Infrastructure Projects, 703

Australia

Sustainable Competitive Advantage for Project-Management Consultants, 700

Autocorrelation

New Crack-Imaging Procedure Using Spatial Autocorrelation Function, 1075

Automatic identification systems

Computer Vision System for Automatic Vehicle Classification, 1113

Managing Traffic With Real-Time Transponders, 1311

Automation

Applications of Artificial Intelligence Techniques to Component-Based Modular Building Design, 83

Automated Field Irrigation System Using Side Weirs, 615

Automatic Truss Design by Optimized Growth, 1015

Automation and Robotics Opportunities: Construction Versus Manufacturing, 116

Beam-Buckling Analysis via Automated Rayleigh-Ritz Method, 858

Canal-Control Needs: Example, 687

Chicago Automates Expressway Lanes, 1307

Comparison of Traditional and Neural Classifiers for Pavement-Crack Detection, 1095

Construction Robot Force Control in Cleaning Operations, 17

Decision-Support System for Long-Range Stream Flow Forecasting, 57

Dynamic-Behavior Modeler for Material Handling in Construction, 71

Kinematics of Excavators (Backhoes) for Transferring Surface Material, 16

Machine Learning of Design Rules: Methodology and Case Study, 72

Robot for Interior-Finishing Works in Building: Feasibility Analysis, 96

Robotics for Challenging Environments, 1409

Role of Advanced Computer Technology in Construction Industry, 78

Systems-Level Evaluation of Automated Urban Freeways, 1114

Auto-regressive moving-average model

Effectiveness of Water-Conservation Measures in Greater Athens Area, 1179

Avalanches

Newtonian Fluid Mechanics Treatment of Debris Flows and Avalanches, 603

Axial compression

Plastic Collapse at Lap Joints in Pressurized Cylinders under Axial Load, 849

Axial forces

Dynamic Stability of Imperfect Frames Under Joint Displacements, 249

Axial loads

Approximate Elastic-Plastic Solution for Axially Loaded Piles, 492

Effect of Boundary Conditions on Buckling of Friction Piles, 236

Influence of Concrete Tensile Ductility on Compressive Strength of Confined Columns, 784

Lateral Postbuckling Analysis of Beam-Columns, 195

Seismic Shear Strength of Reinforced Concrete Columns, 973

Stability of Columns under Uniform Axial Load with Semirigid Connections, 1022

Axisymmetry

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, 176

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, 263
Large Deformation Analysis of Plates on Unilateral Elastic Foundation, 258
Parametric Study of Axisymmetric Circular-Glass Plates, 936

Azimuth
Determination of Look Angles to Geostationary Communication Satellites, 1057

Backfills
Passive Earth Pressures with Various Wall Movements, 475

Backhoes
Kinematics of Excavators (Backhoes) for Transferring Surface Material, 16

Backwater
Jet Flow on Stepped Spillways, 538

Bacteria
Bacterial Density Changes Across Sludge Disposal Facility, 313
Biological Colonization of Granular Activated Carbon Filters in Drinking-Water Treatment, 359
Effect of Aggregation on *Vibrio Cholerae* Inactivation, 358
Kinetics of Ozone Disinfection in Completely Mixed System, 356
Performance Evaluation of Ceramic Filter Candles, 405

Bars
Bar Yield Penetration in Monotonically Loaded Anchorages, 897
Tests of Yielding Anchorages Under Monotonic Loadings, 898

Base isolation
Generalization of Optimal Control Theory: Linear and Nonlinear Control, 169
Instantaneous Optimal Control of Building Frames, 915
Nonlinear Response of Torsionally Coupled Base Isolated Structure, 848
Optimal Design of Base-Isolated Structures with Dynamic Absorbers, 166

Basements, building
Failures of Residential Building Basements in Ohio, 792
Moisture Migration through Basement Walls, 793

Basins
Two-Dimensional Simulation of Basin Irrigation. I: Theory, 671
Two-Dimensional Simulation of Basin Irrigation. II: Applications, 672

Bayesian analysis
Demand-Driven Operation of Reservoirs Using Uncertainty-Based Optimal Operating Policies, 1141

Bays
Analysis of Bayed Beaches in Static Equilibrium, 1199
Characterization of Circulation and Salinity Change in Galveston Bay, 186

Beach erosion
Crest-Breaking Time-Lapse Approach for Measuring Breaker Angle, 1210

Beach nourishment
Beach Nourishment in Presence of Seawall, 1209
Interdependence of Beach Fill Volumes and Repetition Intervals, 1226

Beaches
Analysis of Bayed Beaches in Static Equilibrium, 1199
Beach Nourishment in Presence of Seawall, 1209
Coastal Groins and Nearshore Breakwaters, 1369
Combined Oscillatory and Steady Flow Over Ripples, 1211
Comparison of Wave Reflection Equations with Wave-Tank Data, 1204
Nutrient Retention Time in High-Permeability, Oil-Fouled Beach, 387
Shoreline Solution for Tapered Beach Fill, 1232
Surf-Similarity Parameter for Breaking Solitary-Wave Runup, 1231

Beam columns
Advanced Nonlinear Formulation for Reinforced Concrete Beam-Columns, 1006
Application of Adaptive Analysis to Reinforced Concrete Frames, 1007
Cyclic Testing of Pultruded Fiber-Reinforced Plastic Beam-Column Rigid Connection, 990
Guidelines for Design of Joints between Steel Beams and Reinforced Concrete Columns, 974
Inelastic and Stability Anlysis of Flexibly Connected Steel Frames by Springs-in-Series Model, 1000
Lateral Postbuckling Analysis of Beam-Columns, 195
Nonlinear Analysis of Two-Layered Wood Members with Interlayer Slip, 950
Nonlinear Inelastic Analysis of Steel Beam-Columns I: Theory, 957
Nonlinear Inelastic Analysis of Steel Beam-Columns II: Applications, 958
Parameters Affecting Distortional Buckling of Tapered Steel Members, 1018
Variation of Ductility Capacity of Steel Beam-Columns, 951

Beams
Amplified Microbending in Coated Optical Fibres, 209
Behavior of Deeply Corrugated Steel Plate in Culvert, 934
Comment on Global/Local Method for Low-Velocity Impact Problems, 216
Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, 274
Continuum Model for Analysis of Multiply Connected Perforated Cores, 248
A Dome For the 21st Century, 1242
Equations for Tapered Thin-Walled Beams of Generic Open Section, 246
Experimental Verification of Beam Models for RC, 970
Galerkin Sampling Method for Stochastic Mechanics Problems, 219
Instability of Tapered Thin-Walled Beams of Generic Section, 247
Large Deflection of Beams under Moment Gradient, 260
Load-Deflection Behavior of Space-Based Inflatable Fabric Beams, 30
Long-Term Deflection of RC Beams, 966

Material Nonlinear Analysis of Thin-Walled Beams, 1002
Nonlinear Finite Element Analysis of Concrete Deep Beams, 909
Reliability Assessment of Prestressed Concrete Beams, 857
Reliability-Based Design of Prestressed Concrete Beams, 1019
Static Response of Fiberglass Pretensioned Beams, 861
Time-Dependent Behavior of RC Members Strengthened With FRP Laminates, 900

Beams, supports
Creep and Shrinkage Deflections of RC Beams with Steel Fibers, 780

Bearing capacity
Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, 176
Bearing Capacity of Rectangular Footings on Geogrid-Reinforced Sand, 515
Bearing Capacity of Shallow Foundations on Noncohesive Soils, 510
Bearing Capacity of Soils, 1366
Cyclic Axial Loading of Drilled Shafts in Cohesive Soil, 485
Effect of Material Properties on Compactability and Bearing Capacity, 1096
Note on Bearing Capacity of Soft Clays under Embankments, 417
Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, 240
Regularized Method in Limit Analysis, 224
Structural Capacity of Precast Piles with Grouted Base, 474
Vertical Uplift Capacity of Horizontal Anchors, 466

Bed load
Bed-Load Sampling in Sand-Bed Rivers, 604
Diaphragm Height of Ejector of Uniform Sediment, 547
Effect of Orientation and Size of Helley-Smith Sampler on Its Efficiency, 570
Hydrodynamics of Mining Pits in Erodible Bed under Steady Flow, 602
Investigation of Saltating Particle Motions, 573

Bed load movement
Turbulent Structure of Water and Clay Suspensions with Bed Load, 558

Bed material
Design Relationship for Filters in Bed Protection, 586

Bed movements
Bed-Form Development, 556
Bed-Level Variation in Channel Expansions with Movable Beds, 690

Bed ripples
Distribution of Suspended Sediment over Wave-Generated Ripples, 1194

Bed roughness
Flow Velocity Profiles in Gravel-Bed Rivers, 527

Bedforms
Bed-Form Development, 556

Beds
Combined Oscillatory and Steady Flow Over Ripples, 1211

Bench marks
Barriers to Constructability Implementation, 795
Constructability Programs: Method for Assessment and Benchmarking, 791
Engineering R&D Strategy, 1244
Roadmap to Current Benchmarking Literature, 748

Bending
Amplified Microbending in Coated Optical Fibres, 209
Analytical Solution for Bending of Coaxial Orthotropic Cylinders, 296
Bending of Cord Composite Plates, 206
Elastic Constants for Z-Core Sandwich Panels, 1013
High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, 228
Inelastic Bending and Torsion of Steel I-Beams, 1032
Load-Deflection Behavior of Space-Based Inflatable Fabric Beams, 30
Modeling of Cyclic Moment-Rotation Response of Double-Angle Connections, 859
Rectangular Thick Plate with Free Edges on Pasternak Foundation, 212
Simple Semi-Loof Element for Analyzing Folded-Plate Structures, 160
Stress and Displacement of Thick Doubly Curved Laminated Shells, 237

Bending moments
Combined Boundary Element / Finite Strip Analysis of Bridges, 884
Flat Plates with Regular and Irregular Column Layouts.I: Analysis, 928
Flat Plates with Regular and Irregular Column Layouts.II: Numerical Evaluations, 929
Lateral Load Analysis of Groups of Piles and Drilled Shafts, 460
Load-Carrying Mechanism of Restrained Plates at Large Deflections, 235
Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, 273

Benefit cost analysis

Early Detection of Rock Movement with Time Domain Reflectometry, 481
Nonlinear Analysis of Angle-Ply Composite and Sandwich Laminates, 38

Shear failure
Design of Prestressed Hollow Core Slabs with Reference to Web Shear Failure, 992

Shear flow
Torsion of Regular Multicellular Members, 1048

Shear forces
Distribution of Shear Force on Boundary of Smooth Rectangular Duct, 571
Nonlinear Finite Element Analysis of Concrete Deep Beams, 909

Shear lag
Negative Shear Lag in Framed-Tube Buildings, 1016
Simple Method for Approximate Analysis of Framed Tube Structures, 910

Shear modulus
Extraction of Dynamic Soil Properties Using Extended Kalman Filter, 516
Shear Modulus of Kaolin Containing Methane Bubbles, 447

Shear resistance
Stress-Path Dependent Shear Strength of Sand, 456

Shear strain
Cyclic Threshold Shear Strains in Soils, 521

Shear strength
Influence of Membrane Forces on Transverse-Shear Reinforcement Design, 917
Interface Shear-Strength Properties of Roughened HDPE, 446
Landfill Liner Interface Strengths from Torsional-Ring-Shear Tests, 437
Punching Shear Strength of Steel Fiber Reinforced Concrete Slabs, 765
Reinforcing Sand With Strips of Reclaimed High-Density Polyethylene, 450
Seismic Shear Strength of Reinforced Concrete Columns, 973
T-Bar Penetration Testing in Soft Clay, 522

Shear stress
Accurate Estimation of Interface Shear Stresses in Composite Masonry Walls, 899
Behavior of Reinforced High-Strength–Concrete Corbels, 908
Combined Oscillatory and Steady Flow Over Ripples, 1211
Interface Shear Stress in Overlaid Concrete Pavements, 1072
Lacey Divergence Equations for Alluvial-Canal Design, 600
Seepage Effects on Sand-Bed Channels, 616
Size Effect in Fiber or Bar Pullout with Interface Softening Slip, 266
Spalling of Continuously Reinforced Concrete Pavements, 1086
Streambed Armoring, 577
Surface Settlement Due to Shear Stresses at Depth, 470
Velocity Measurements in Asymmetric Turbulent Channel Flows, 582

Shear tests
Drained Residual Strength of Cohesive Soils, 451
Landfill Liner Interface Strengths from Torsional-Ring-Shear Tests, 437
Model Prediction of Anisotropic Behavior of Boston Blue Clay, 415
Strength of FRC Corbels in Flexure, 866
Uplift Capacity of Small-Diameter Drilled Shafts from In Situ Tests, 478

Shear walls
Analysis of Free Vibrations of Tall Buildings, 261
New Methodology for Seismic Design of RC Shear Walls, 892
Stiffness of Low Rise Reinforced Concrete Shear Walls, 1416

Sheet piling
Building A Barrier Wall Through Boulders, 1320

Sheets
Compression Strength of Pultruded Flat Sheet Material, 762

Shell structures
Flat Plates with Regular and Irregular Column Layouts.I: Analysis, 928
Flat Plates with Regular and Irregular Column Layouts.II: Numerical Evaluations, 929
Lower Bounds for Overall Buckling of Spherical Space Domes, 211
Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, 172
Spatial, Lattice and Tension Structures, 1412

Shells
hp Version of Finite-Element Mixed Method, 285
Stress and Displacement of Thick Doubly Curved Laminated Shells, 237

Ship bridge collisions
Design of Bridge Pier Pile Foundations for Ship Impact, 2

Ships
Effects of Commercial Vessel Passage in Narrow Channels With and Without Ice Cover, 49

Shoaling
Shoaling of Solitary Waves on Plane Beaches, 1228

Shock
One-Dimensional Shock and Quasi-Static Liquefaction of Silt and Sand, 504

Shock waves
Shock-Wave Reduction by Bottom Drop, 594
Supercritical Flow Behind Chute Piers, 598

Shore protection
Characteristics of Solitary Wave Breaking Induced by Breakwaters, 1196
Nutrient Retention Time in High-Permeability, Oil-Fouled Beach, 387

Shoreline changes
Recent Improvement of Gao Qiao New Channel on Huangpu River, 1213
Shoreline Solution for Tapered Beach Fill, 1232

Shotcrete
Performance of Gunite Brow Ditches, 679
Steel-Fiber–Reinforced Wet-Mix Shotcrete: Comparisons with Cast Concrete, 776

Shrinkage
Creep and Shrinkage Deflections of RC Beams with Steel Fibers, 780
Long-Term Deflection of RC Beams, 966
Performance of Slab-on-Grade Foundations on Expansive Soil, 796
Predicting Creep and Shrinkage Effects in Cracked Concrete Elements, 998
Swell-Shrink Behavior of Compacted Clay, 438
Time-Dependent Behavior of RC Members Strengthened With FRP Laminates, 900

Sight
Effect of Restriction of Vision on Driving Performance, 1106

Signal processing
Vibration Testing for Nondestructive Evaluation of Bridges. I: Theory, 862
Vibration Testing for Nondestructive Evaluation of Bridges. II: Results, 863

Signalized intersections
Probabilistic Delay Model at Stop-Controlled Intersection, 1063

Signals
Amplified Microbending in Coated Optical Fibres, 209
Simulation of Multi-Dimensional, Anisotropic Ground Motions, 255

Silica
Characteristics of Silica-Fume Concrete, 772

Silos
Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, 210
Plastic Collapse at Lap Joints in Pressurized Cylinders under Axial Load, 849

Silts
Hyperbolic Stress-Strain Parameters for Silts, 427
Management of Recharge Dams in Saudi Arabia, 1178
Piezometer Performance at Wildlife Liquefaction Site, California, 457

Silty soils
Case Study of Debris Flow, 799
Ground Failures Under Seismic Conditions, 1387

Simulation
Automated Construction-Simulation Optimization, 112
Change in Gasoline Constituent Mass Transfer During Soil Venting, 401
Downstream Control Algorithm for Irrigation Canals, 645
Estimating Construction Productivity: Neural-Network-Based Approach, 69
Model Studies of Effects on Lunar Soil of Chemical Explosions, 495
Modeling of Cyclic Moment-Rotation Response of Double-Angle Connections, 859
Passenger-Terminal Simulation Model, 1093
Sediment Deposition and Entrapment in Vegetated Streambeds, 689
Simulated Seismic Load Tests on Reinforced Concrete Columns, 945
Simulating Structural Analysis with Neural Network, 70
Simulation of Blast Pressure on Flexible Panels, 955
Simulation of Multi-Dimensional, Anisotropic Ground Motions, 255
Simulation Verifies Queuing Program for Selecting Loader-Truck Fleets, 113
Structural Response to 3D Simulated Earthquake Motions in San Bernardino Valley, 1001

Simulation models
Conjunctive Operation of Hydroelectric and Thermal Power Plants, 1180
Effect of Testing Variability on Contractor Payment for Asphalt Pavements, 124
Effects of Commercial Vessel Passage in Narrow Channels With and Without Ice Cover, 49
Stream Water-Temperature Sensitivity to Weather and Bed Parameters, 568

Sinkholes
Cover-Subsidence Sinkhole Evaluation of State Road 434, Longwood, Florida, 512

Site investigation
Building A Barrier Wall Through Boulders, 1320
Integrated GIS for Construction Site Investigation, 101
Quality Assurance for Hazardous-Waste Projects, 1340
State Parameter from Self-Boring Pressuremeter Tests in Sand, 517

Site selection
Heuristic Algorithm to Locate Solid-Waste Disposal Site, 1123
Optimal Land Allocation for Solid- and Hazardous-Waste Landfill Siting, 371
The Politics of Nuclear-Waste Disposal, 1253
Simultaneous Routing and Siting for Hazardous-Waste Operations, 1131

Size
Does Reentrainment Occur During Cohesive Sediment Settling?, 536
Effect of Orientation and Size of Helley-Smith Sampler on Its Efficiency, 570
Riprap Sizing for Modified ARS-Type Basin, 539
Runoff Detention for Flood Volume or Erosion Control, 624

Size effect
Flexural Strength of Fiber Cementitious Composites, 774
Fractals, Fractures, and Size Effects in Concrete, 204

Fracture Size Effect: Review of Evidence for Concrete Structures, 976
Influence of Specimen Size on Effect of Curing Regime on Concrete Compressive Strength, 750
Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, 240
Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, 231
Size Effect in Fiber or Bar Pullout with Interface Softening Slip, 266
Storm and Entrainment Effects on Tributary Sediment Loads, 528

Skew bridges
Collapse Loads of Continuous Skew Composite Bridges, 919
Parametric Study on Collapse Loads of Skew Composite Bridges, 920

Skewness
Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, 214

Slabs
Combined Boundary Element / Finite Strip Analysis of Bridges, 884
Deformations in Composite Prestressed Concrete Bridge Deck Panels, 1023
Design of Prestressed Hollow Core Slabs with Reference to Web Shear Failure, 992
Different Approaches to Rating Slab Bridges, 1014
Dynamic Modeling of Slab Formwork during Concrete Placement, 965
Earthquake Response of Flat-Slab Buildings, 896
Effect of Orientation of Approach Slabs on Pavement Deformation, 1097
Equivalent Frame Analysis of Flat Plate Buildings for Seismic Loading, 962
Finite Element Modeling of Continuous Posttensioned Voided Slab Bridges, 881
Influence of Membrane Forces on Transverse-Shear Reinforcement Design, 917
Nonlinear Finite Element Analysis of Deteriorated RC Slab Bridge, 870
Performance of Slab-on-Grade Foundations on Expansive Soil, 796
Punching Shear Strength of Steel Fiber Reinforced Concrete Slabs, 765
Reinforced-Concrete Dimensioning Based on Element Nodal Forces, 939
Seismic Vulnerability of Flat Slab - Core Buildings, 865
Splicing Strength of Welded Steel Mesh in Concrete Bridge Decks, 985
Standard for the Structural Design of Composite Slabs (ANSI/ASCE 3-91) Standard Practice for Construction and Inspection of Composite Slabs (ANSI/ASCE 9-91), 1413
Survey Results for Concrete Construction Live Loads on Newly Poured Slabs, 927

Slag
By-Product of Sulfur Recovery from Phosphogypsum as Concrete Aggregate, 777
Rebar Corrosion and Sulfate Resistance of Blast-Furnace Slag Cement, 764

Slenderness ratio
Slenderness K factor for Leaning Columns, 1009

Slides
Case Study of Debris Flow, 799

Sliding
Permanent Deformation on Preexisting Sliding Surfaces in Dams, 513

Slip
Algorithm for Hysteresis Analysis of Prestressed-Concrete Frames, 940
Nonlinear Analysis of Two-Layered Wood Members with Interlayer Slip, 950
Pullout of Inclined Fibers from Cementitious Matrix, 301
Size Effect in Fiber or Bar Pullout with Interface Softening Slip, 266

Slip surface
Unified Formulation for Analysis of Slopes with General Slip Surface, 469

Slipping
Effect of Bolt Slippage on Ultimate Behavior of Lattice Structures, 971

Slope stability
Gully Erosion Minimization on Reclaimed Surface Mines Using SSAST Computer Model, 675
Landfill Liner Interface Strengths from Torsional-Ring-Shear Tests, 437
Protecting a Pipeline, 1334
Pseudostatic Seismic Stability of Slopes: Design Charts, 487
Reliability Applied to Slope Stability Analysis, 520
Surficial Stability of Compacted Clay: Case Study, 509
Unified Formulation for Analysis of Slopes with General Slip Surface, 469

Slopes
Comparison of Models for Subsurface Drainage in Flat and Sloping Lands, 631
Damage Mechanisms and Influence of Gradation for Steep Riprap, 432
Liquefaction-Induced Lateral Spreading of Mildly Sloping Ground, 523
Performance of Gunite Brow Ditches, 679
Potential-Flow Solution to 2D Transition from Mild to Steep Slope, 559
Reliability Applied to Slope Stability Analysis, 520
Spatially Averaged Conservation Equations for Interacting Rill-Interrill Area Overland Flows, 608
Unified Formulation for Analysis of Slopes with General Slip Surface, 469

Slots
Checking Concrete Growth, 1241
Flow Past Two-Dimensional Lateral Slot, 403

Sludge
Bacterial Density Changes Across Sludge Disposal Facility, 313
Effect of HRT on Acidogenic Digestion of Primary Sludge, 343
Effect of Preagitation on Freeze-Thaw-Conditioned Sludge Dewaterability, 54
Histological Analysis of Microstructure of UASB Granules, 384
Innovative Civil Engineering Material from Sewage Sludge: Biocement and Its Use As Blended Cement Material, 751

Sludge disposal
Bacterial Density Changes Across Sludge Disposal Facility, 313

Slurries
Perimeter Load Transfer in Model Drilled Shafts Formed under Slurry, 518
Soil Washing and Biotreatment of Petroleum-Contaminated Soils, 374

Slurry walls
Hydraulic Conductivity Assessment of Slurry Wall Using Piezocone Test, 497

Small business
Sustainable Competitive Advantage for Project-Management Consultants, 700

Small crafts
